## Activity - Basic flexbox and discussion

### Activity - Basic flexbox

There are several more flexbox related properties that we will learn. However, there is a lot already that can be accomplished with only `display:flex`, `flex-flow`, and `flex`. So let's explore.

You can edit in this [CodePen](#).

HTML	Result
<pre>1 &lt;!DOCTYPE html&gt; 2 &lt;html lang="en"&gt; 3 4 &lt;head&gt; 5   &lt;meta charset="UTF-8"&gt; 6   &lt;title&gt;Flexbox&lt;/title&gt; 7   &lt;style&gt; 8     body{ margin:0px; } 9 10    p { 11      margin:10px;</pre>	<p>For a long time I used to go to bed early. Sometimes, when I had put out my candle, my eyes would close so quickly that I had not even time to say</p> <p>For a long time I used to go to bed early. Sometimes, when I had put out my candle, my eyes would close so quickly that I had not even time to sav</p>

Resources 1x 0.5x 0.25x Rerun

The resulting layout should look like this:

For a long time I  
used to go to bed  
early. Sometimes,  
when I had put out  
my candle, my eyes  
would close so  
quickly that I had  
not even time to say

For a long time I used to go to bed early.  
Sometimes, when I had put out my  
candle, my eyes would close so quickly  
that I had not even time to say

For a long time I  
used to go to bed  
early. Sometimes,  
when I had put out  
my candle, my eyes  
would close so  
quickly that I had  
not even time to say

For a long time I  
used to go to bed  
early. Sometimes,  
when I had put out  
my candle, my eyes  
would close so  
quickly that I had  
not even time to say

**NOTE:** Please do **not** upload HTML code to the discussion forum.
