Activity - CSS selectors

Activity - CSS selectors

Using the HTML below (in this [CodePen](#)), please style the two lists by following these instructions:

- The female characters are in blue text, and the male characters are red
- Dorothea Brooke and Sydney Carton are bold text
- Joshua Rigg and Madame Defarge are italicized
- The list for Middlemarch is enumerated with roman numerals
- The list for A Tale of Two Cities is enumerated with alpha characters
- The list items for Middlemarch are spaced out more
- The list for Middlemarch has been moved rightward
- Serif font is not used anywhere on the page

Can you achieve the same styling without adding any new tags (i.e., without adding `<i>` or `` or ``)? Feel free to modify the HTML, but try not to add any new `id` attributes, if possible.

```

1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5     <meta charset="UTF-8">
6     <title>Characters</title>
7     <style>
8         /* style rules go here */
9     </style>
10 </head>
11
12 <body>
13     <h1>Characters</h1>
14     <h2>Middlemarch</h2>
15     <h3>George Eliot</h3>
16     <ol id="middlemarch">
17         <li>Dorothea Brooke</li>
18         <li>Celia Brooke</li>
19         <li>Edward Casaubon</li>
20         <li>Sir James Chettam</li>

```

NOTE: Depending upon your browser, the bullet points on your list may be the same color as the text or not. (In the screenshot provided they are black). Setting those colors to be independent (or not) is NOT part of the assignment. Try it out in various browsers and see how it behaves.
