Attributes (1-9)

Source code for question 1

```
1. <!DOCTYPE html>
2.
3. <html>
4.   <meta charset='UTF-8'>
5.   <head>
6.     <p> HEY YOU </p>
7.     <style>
8.     </style>
9.     <script>
10.    </script>
11.  </head>
12.  <body>
13.    <h1>YO</h1>
14.  </body>
15. </html>
```

1. Hey you!

1 point possible (graded)

Is it valid to have a paragraph element inside the `<head>` tag like in the code above? (If you are unsure, please check the W3C cheatsheet or MDN's `<head>` element page)

☐ No

☐ Yes

Submit

You have used 0 of 1 attempt

2. Show me your id

1 point possible (graded)

```
<p id="intro">Hi! My name is Alex and I love to cook.</p>
```

Unlike most attributes, the id of an element should be:

- ☐ split by spaces if you want to specify multiple values
- ☐ the same across a given type of element i.e. all paragraphs have the same id
- ☐ unique to that element and can only be used once
- ☐ written in all caps ("ID=")

Submit

You have used 0 of 2 attempts

3. Tag specific?

1 point possible (graded)

True or False? The non-global attribute 'size' can only be applied to one tag.

- ☐ False
- ☐ True

Submit

You have used 0 of 1 attempt

4. It's required!

1 point possible (graded)

What are the required attributes in an image tag?
(Select all that apply - 2 answers are correct!)

☐ src☐ title☐ height☐ alt

You have used 0 of 3 attempts

5. Tooltip in title

1 point possible (graded)

True or False? A tooltip in the title attribute can only be used on images.

☐ False☐ True

You have used 0 of 1 attempt

6. Browser support?

1 point possible (graded)

True or False? All browsers support all attributes.

☐ False☐ True

You have used 0 of 1 attempt

7. Valid id attribute?

1 point possible (graded)

Which of the following is a valid value following best practice for the `id` attribute?☐ `< p id="" > < /p >`☐ `< p id="NaViGaTiOn" > < /p >`☐ `< p id="score-display" > < /p >`☐ `< p id="Frequently asked questions" > < /p >`

You have used 0 of 2 attempts

8. Truly global

1 point possible (graded)

Which of the following statements about global attributes is true?

☐ All global attributes are of type boolean☐ Global attributes are common to all elements☐ Only 'id' and 'class' are global attributes☐ Global attributes only apply to elements that do not have any attributes of their own

You have used 0 of 2 attempts

9. Multiple classes

1 point possible (graded)

What do you use to split multiple classnames in the 'class' attributes?

☐ You can only specify one classname in the 'class' attribute

☐ space

☐ comma

☐ colon

You have used 0 of 2 attempts
