## FEWD certificate

### W3C "Front-End Web Developer" professional certificate

Professional Certificate programs are series of courses designed by industry leaders and/or top universities to build and enhance critical professional skills needed to succeed in today's most in-demand fields.

W3C has designed a "[Front-End Web Developer](#)" (FEWD) [Professional Certificate](#) where you will learn all of the necessary skills needed to build interactive and responsive user experiences on the Web. This program will deepen your knowledge of the 3 foundational languages that power the Web: HTML5, CSS and JavaScript. The W3C FEWD program is composed of 5 courses:

1. This course: [HTML5 and CSS Fundamentals](#) (formerly titled HTML5 Introduction)
2. [HTML5 Coding Essentials and Best Practices](#) (formerly titled HTML5 Part 1)
3. [HTML5 Apps and Games](#) (formerly titled HTML5 Part 2)
4. [CSS Basics](#)
5. [JavaScript Introduction](#)

To get a W3C FEWD professional certificate, you must successfully pass and receive a Verified Certificate in the five courses above. Note that the [dashboard link to Front-End Web Developer Program](#) displays upgrade links to all of the courses in the program AND offer the option to "upgrade all remaining courses" in bulk.

**IMPORTANT:** *If you already have a verified certificate in one or more of these courses, you do NOT need to re-take that course.*
