## Activity - your first Web page and discussion

### Activity - Your first Web page

For your first Web page, we propose that you:

- Quote some poetry, preserving the "line oriented" format
- Find a word that has at least 3 different definitions, list them in any order ([this Web site](#) may be helpful)
- Try out some different tags to see the effect they have on your Web page

**Note:** If you wish to share your HTML code in the discussions, you can paste your code directly in a discussion forum post (highlight code and Ctrl+K/use the code widget), but we'd prefer that you use one of the following online code editors:

- JS Bin: <http://jsbin.com> ([JS Bin tutorial](#))
- CodePen: <http://codepen.io> ([CodePen tutorial](#))

These are HTML, CSS, and JavaScript code editors that preview/showcase your code bits in your browser. It helps with cross-device testing, real-time remote pair programming.

## Discussion
