Module 3 - Content

Module 3 - Content

3.1 Introduction to Module 3: Get an overview of what CSS (Cascading Style Sheets) can do for your Web pages.

3.2 CSS basic syntax: Understanding the language of CSS: style tags, links tags, rules, and comments.

3.3 CSS properties: Here, you will be introduced to just a few of the many properties that make CSS such a powerful tool.

3.4 Lists and selectors: List markup tags (``, `` and ``) are some of the most frequently used specific purpose tags in HTML, and selectors are what allows you to target specific HTML elements and apply style to them

3.5 Exercises - Module 3: Let's see what you learned in Module 3 of the course.
