Activity - Units and discussion

Activity - Units

With the HTML below, please size the text using different units:

- Use `px` units to set the root size of the text for the document.
- Use `rem` units to size the `h1` and `li` tags.
- Change the text size of the root CSS rule. You should observe all the text of the document adjusting appropriately.
- Change the `h1` so that it uses `px` units. As the root CSS rule is changed, the `h1` will no longer adjust with the rest of the document.

Please experiment by editing the following [Codepen](#):
