Debugging (18-25)

18. Finding CSS rules

1 point possible (graded)

True or False? While it's possible to examine html elements in the debugger, it is impossible to see CSS Rules.

☐ False

☐ True

Submit

You have used 0 of 2 attempts

19. CSS properties

1 point possible (graded)

True or False? You can use the debugger (or inspector) to see the computed CSS properties, and you can also see rules that have been overridden by more specific rules.

☐ False

☐ True

Submit

You have used 0 of 2 attempts

20. Debugger

1 point possible (graded)

Which of the following can be modified in the debugger?

- ☐ the color of text on your Web page
- ☐ background image of your Web page
- ☐ background of your desktop on the machine you're using
- ☐ text content of an element
- ☐ class and id attributes

(Select all that apply, there are 4 correct answers!)

Submit

You have used 0 of 4 attempts

21. Multiple elements selection

1 point possible (graded)

True or False? Using the settings in the right pane, it is possible to select multiple different, unrelated elements and change them all at once.

- ☐ False
- ☐ True

Submit

You have used 0 of 1 attempt

22. Color settings

1 point possible (graded)

True or False? When in the debugger, if you change color settings for a Web site you are visiting, other people will see the changes, allowing you to effectively hack any Web site.

☐ False

☐ True

Submit

You have used 0 of 1 attempt

23. Named colors

1 point possible (graded)

True or False? Using the debugger, I can find all the named colors that start with 'c'.

☐ False

☐ True

Submit

You have used 0 of 1 attempt

24. CSS changes

1 point possible (graded)

True or False? I can use the debugger to make CSS changes, but I can't otherwise affect HTML elements.

☐ False

☐ True

You have used 0 of 1 attempt

25. Inline style settings

1 point possible (graded)

True or False? It is possible to override style settings associated with a specific tag type and 'id', like 'article#first', using the 'styles' tab in the right panel.

☐ False☐ True
