Recipe project - Module 5 and discussion

Recipe project - Module 5

Let's up some of our code, as well as improve the look and feel of our Web page! Try moving all of your CSS code to a separate file (don't forget to link to it).

We're also going to make the nav element move out of the way when we're not using it, so that it only slides out when we're hovering on it.

Finally, we'll convert the Ingredients list to a table with ingredients and amounts.

Give it a try, and when you're done (or if you get stuck), watch the video below to see what we did.
