Activity - Debugger and discussion
Activity - Debugger

Using your favorite browser, navigate to Wikipedia.org. Using the developers tools, change the title and header of the page to "My Wikipedia" and change the background to light green.

(*Hint*: use "Inspect" or "Inspect Element").

In another browser window, open up Wikipedia.org. Does it look like the one you've modified? Why or why not? Did you just break Wikipedia for the rest of the world?
