13 ▾     <h1>cornerpiece</h1>
14 ▾     <p>For a long time I used to go to bed early. Sometimes, when I had put out my
     candle, my eyes would close so quickly that I had not even time to say "I'm going
     to sleep." And half an hour later the thought that it was time to go to sleep
     would awaken me; I would try to put away the book which, I imagined, was still in
     my hands, and to blow out the light; I had been thinking all the time, while I was
     asleep, of what I had just been reading, but my thoughts had run into a channel of

Resources
```

The project file consists of a very long bit of prose and at the end has a single `<img>` tag.

- Get the cornerpiece `<img>` element to appear in the lower right of the viewport. It should not scroll with the rest of the document.

- That cornerpiece likely obscures any text that it overlaps. Try to get the document text to be on top of the cornerpiece. You will have to adjust the HTML to achieve this.

- That cornerpiece is definitely a decorative graphic. Remove the `<img>` tag and use decorative CSS. Again, you will have to change the HTML to achieve this.
