Activities - Images and discussion
Activities - Images

1. Create a simple Web page that talks about your day using only text and images. Include at least three images and add the `alt` and `title` attributes.

2. Look through the Web and your favorite Web sites and identify those that you think use a lot of decorative images.

3. Create a HTML page and add the following types of images:
   - Informative image that represents concepts and information
   - Decorative image
   - Images of text

   Use the `alt` attribute to provide alternate text for the images above.

   Refer to the WAI Images Tutorial for a guide to writing alternate text.

Note: If you wish to share your HTML code in the discussions, you can paste your code directly in a discussion forum post (highlight code and Ctrl+K/use the code widget) or use one of the following online code editors:

- JS Bin: http://jsbin.com (JS Bin tutorial)

- CodePen: http://codepen.io (CodePen tutorial)

These are HTML, CSS, and JavaScript code editors that preview/showcase your code bits in your browser. It helps with cross-device testing, realtime remote pair programming.
