Module 4 - Content
Module 4 - Content

4.1 Introduction: You will now begin learning how to fix your Web page when it's not doing what you hoped it would do.

4.2 Tools: Learn about tools and accessibility and how they relate to debugging.

4.3 The Box Model: Understanding the CSS Box Model and how to control the spacing of elements on the page.

4.4 Precedence: Which style controls what? — using the debugger in the browser to understand conflicting rules.

4.5 Give Your Mind a Workout: Lets see what you have learned about debugging your code.
