Recipe project - Module 2 and discussion

Recipe project - Module 2

We are now going to continue building on the recipe project we started in Module 1. You can find our version in the CodePen below.

See the Pen pPaPXZ by W3Cx (@w3devcampus) on CodePen.

Feel free to build on your own or on that one, whichever you prefer. We can apply some of what we've learned this week to improve our page, both in terms of looks a structure. Also, we've added a couple more recipes, so we have a more realistic situation, i.e. multiple recipes rather than just one.

Try to make good use of semantic elements, images and hash links to get something like this:

See the Pen Recipe week 2 by W3Cx (@w3devcampus) on CodePen.
