Comments
Comments

CSS can include "comments" as well, by which you, the developer today, can leave notes and reminders to you, a different developer tomorrow. Or to others who might read your CSS.

Comments begin with `/*` and **must** end with `*/` and they can span several lines. But they **cannot** be nested.

```
 1. p {
 2.    font-size: 8px; /* client insists small text makes them
    more 'professional'. */
 3.    /* I hope his idea of 'professional' includes paying on
    time. */
 4.
 5.    line-height: 24px; /* see above */
 6.
 7.    /* none of the stuff below is working. I don't know why.
 8.
 9.    margin-top: 5%;
10.    margin-bottom:6%;
11.    */
12. }
```
